PROFILE

CAPM-certified project professional with expertise in project planning, scheduling, documentation, and stakeholder coordination. Skilled in supporting end-to-end project execution, maintaining project timelines, tracking risks and issues, and managing resources in alignment with PMI methodologies. Strong ability to collaborate with cross-functional teams, prepare project reports, and ensure compliance with project governance standards. Committed to delivering high-quality project outcomes and contributing effectively to PMO and project management functions.

PROFESSIONAL EXPERIENCE

Sodales Lab India Pvt. Ltd., Web Developer 06/2023 – Present | Pune

- Developed **responsive SAP UI5 applications** using XML views, HTML5, CSS3, and JavaScript while adhering to **SAP Fiori design principles** for consistent and user-friendly interfaces.
- Integrated and consumed **OData V2 services**, implementing efficient **model binding, routing, fragments, formatters, and custom controls** to enhance application functionality and performance.
- Designed and customized **Fiori Elements applications**, configured **tiles, catalogs, and groups** in the **Fiori Launchpad**, and ensured seamless application launch and navigation.
- Utilized **Git-based version control** within SAP Business Application Studio and executed **application deployment on SAP BTP**, supporting CI/CD-ready project workflows.

SKILLS

Technical Skills — SAP UI5 Development (XML, JavaScript, MVC) | | **Fiori Elements & Freestyle Apps** | | **Fiori Launchpad Configuration** | | **UI5 Controls, Fragments, Formatters** | | **Routing & Navigation** | | **Custom App Extensions** | | **OData V2 Integration & CRUD Operations**

PROJECTS

SAP BTP Deployment & Release Management Simulation 05/2025 – 08/2025

- Led the **end-to-end deployment** of a SAP UI5 application on **SAP BTP Cloud Foundry**, ensuring smooth transport, testing, and production readiness.
- Prepared essential **project management documentation**, including release schedules, issue/RAID logs, stakeholder communication plans, and transport checklists to support structured project execution.

SAP UI5 Application Development & Agile Delivery 01/2025 – 04/2025

- Designed and developed an **SAP UI5 Employee Self-Service application** using XML views, JavaScript controllers, fragments, and MVC architecture.
- Applied **Agile and CAPM methodologies** by preparing the project charter, WBS, sprint backlog, and release plan to support structured execution.
